INTRODUCTION

Frontend developer with hands-on experience building responsive web and mobile applications using React, Next.js, and TypeScript. Currently completing a B.Tech in Computer Science at FUTA while actively contributing to production-level projects. Skilled in translating Figma designs into functional, performant interfaces with clean, maintainable code. Seeking a full-time frontend role where I can contribute immediately and continue to grow.

SKILLS

- Frontend Development: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, React Native (Expo)
- UI/UX Implementation: Pixel-perfect Figma-to-code conversion, responsive and mobile-first design, reusable component architecture, accessibility-aware UI development
- State & Form Management: Redux Toolkit, Zustand, React Query, React Hook Form
- APIs & Backend Services: RESTful API integration, Appwrite, Supabase
- Tools & Workflow: Git, GitHub, Vite, Expo Router, Figma
- Soft Skills: Problem-solving, attention to detail, communication, teamwork, fast learning

PROFESSIONAL EXPERIENCE

Frontend Developer
(Volunteer) — L!nkup

October 2025 – Present

- Built and maintained responsive UI components for the L!nkup web platform using React and modern frontend tooling, ensuring consistency across the design system.
- Translated wireframes and design concepts from Figma into functional, accessible web pages in close collaboration with the design and product team.
- Ensured cross-browser compatibility and mobile responsiveness across different screen sizes and devices.
- Optimized frontend performance by identifying and resolving UI bottlenecks and improving rendering efficiency.
- Participated in iterative product improvement by resolving UI bugs and incorporating feedback from team reviews.

Frontend Developer
(Freelance & Independent Projects)

January 2023 – Present

- Designed and developed responsive web applications using React, Next.js, Tailwind CSS, and TypeScript.
- Built a full fintech web application (Anchor Clone) with dashboards, multi section architecture, and simulated authentication flow
- Developed CloudHub, a SaaS landing page with theme toggling, GSAP animations, and responsive design across devices.
- Optimized website performance and improved Core Web Vitals through code and asset optimization

PROJECTS

- Anchor Real Estate Loan Website – Fintech Clone
Stack: TypeScript, Next.js, Tailwind CSS
Live: <https://anchor-clone.vercel.app>
A multi-section fintech web application featuring dashboards, simulated authentication flow, and a clean financial product UI.
- Furnisheet – Furniture Rental Platform
Stack: TypeScript, React, Next.js, Tailwind CSS
Live: <https://furnisheet-nextjs-9xbf.vercel.app>
An e-commerce web app for browsing and renting furniture, with product listings, cart functionality, and responsive layout.
- CloudHub – SaaS Landing Page
Stack: TypeScript, Next.js, Tailwind CSS, GSAP
Live: <https://cloudhub-steel.vercel.app>
An interactive SaaS landing page with theme toggling, scroll-based GSAP animations, and fully responsive design.
- SuperDAO – DAO Platform Landing Page
Stack: TypeScript, Next.js, Tailwind CSS
Live: <https://superdao-landing.vercel.app>
A clean, modern landing page for a decentralized autonomous organization platform.
- MeditationApp – Mobile Meditation App
Stack: TypeScript, React Native (Expo), Appwrite, Zustand, React Query
Repo: <https://github.com/Jay-Tiroh/MeditationApp>
A cross-platform mobile app with onboarding, authentication, and session tracking, built with a full auth flow powered by Appwrite.
- Housely – Property Discovery App
Stack: TypeScript, React Native (Expo)
Repo: <https://github.com/Jay-Tiroh/Housely>
A mobile property discovery app featuring location-based search, maps integration, reverse geocoding, and Google Places API.
- Product List with Cart – Frontend Mentor Challenge
Stack: HTML, JavaScript, Tailwind CSS
Live: <https://chizuru-product-list.vercel.app>
A responsive product listing UI with an interactive cart, built as a Frontend Mentor challenge.

EDUCATION

BTech in Computer Science
Federal University of Technology Akure
06/2023 - Present
Current Level: 400

INTERESTS

- Artificial Intelligence and emerging technologies
- Web animations and interactive interfaces
- Mobile application development
- Building digital solutions for local businesses
- Open source contribution
